Women who started menstruating (having periods) younger than age 12 have a higher risk of breast cancer later in life. The same is true for women who go through menopause when they're older than 55.

### **Menstrual History - breastcancer.org**

Midlife women have been led to believe that hormone replacement therapy is an either/or proposition: either you take it or you suffer the symptoms of menopause. In reality, however, women do not have to be plagued by hot flashes, night sweats, brain fog, depression and weight gain as they go through
